Wednesday 1st November 2017

Dear Parents/ Carers,

HOMework

In Year 1 this term, our topic is a History one about the 'Great Fire of London' and we will also be learning about 'Light' in Science.

After seeing some of the amazing homework projects that the children in Key Stage Two are completing, we would now like to offer the opportunity for children in Key Stage One to undertake more homework activities.

Each term, I will send home a menu of activities linked to our science and history/geography topics for the children to have a go at. I would like the children to complete one of the activities, or come up with an activity of their own, and bring into school to share with the class.

I would like your child to choose an activity from this list to complete (or an idea of their own) to bring into school for Monday 11th December.

Alongside this homework, it is also vital that your child continues to:

- read five times a week and answer questions about their book
- work on their literacy and numeracy targets (as highlighted in their reading diary).

Many thanks for your continued support,

Miss Lucy Cope
