Dear Parents,

Homework

In Year 2 this term, we will be learning about the local area in 'What would Marvin find interesting about Willington?' and we will also be learning about 'Forces and Motion'.

After seeing some of the amazing homework projects that the children in Key Stage Two are completing, we would now like to offer the opportunity for children in Key Stage One to undertake more homework activities.

Each term, I will send home a menu of activities linked to our science and history/geography topics for the children to have a go at. I would like the children to complete one of the activities, or come up with an activity of their own, and bring into school to share with the class.

I would like your child to choose an activity from this list to complete (or an idea of their own) to bring into school for Monday 11th December.

Alongside this homework, it is also vital that your child continues to:

- read five times a week and answer questions about their book
- learns their spelling words and investigates the weekly spelling rule
- works on their literacy and numeracy targets (as highlighted in their reading diary).

Many thanks for your continued support,

Miss Laura Pritchard
